Summary

Versatile Automation Test Analyst and Manual Tester with over 2 years of experience in ensuring the quality of a diverse range of software applications. Skilled in both automated and manual testing processes, utilizing top-tier tools like Lean FT, Selenium, JUnit, and TestNG. Possessing robust analytical and communication abilities which foster productive collaborations with multifunctional teams. Expert at pinpointing defects, augmenting test coverage, and elevating software reliability and user satisfaction.

Career Objective

Seeking a position as an Automation Tester/Software Tester that capitalizes on my sharp problem-solving skills, proactive attitude, and meticulous attention to detail. Eager to continuously evolve and apply my skills in the realm of information technology, contributing to projects and initiatives of significance.

Employment History

Automation Test Analyst, Automation Lead/ Test Lead (Promoted) 1st People Services, 169 Newcastle St, Fyshwick ACT 2609	Jun 2021 - PRESENT
<ul style="list-style-type: none">• Client: National Health and Medical Research Council (NHMRC)• Technical proficiency in functional, end-to-end, and regression test automation using Java• Familiarity with automation tools, including Selenium WebDriver, TestNg, and Lean FT• Skilled in building and executing automated test scripts• Expertise in designing and implementing test automation strategies• Organizing and monitoring the defect management process through Zoho Desk, ServiceNow and Dynamic CRM• Synthetic monitoring capabilities with Micro Focus• Proficient with GIT for version control• Collaboration and ticket management experience using Zoho Desk• Provided Level 3 support• Experience in utilizing Microsoft 365, SharePoint, and Dynamics CRM

Project – Developed Administration Portal	

- Worked extensively with large codebases
- Wrote maintainable code using Angular, PHP, and MySQL
- Proficient in Google Apps Script
- Utilized version control systems, specifically Git
- Collaborated using Asana as a primary tool
- Managed Apache web server configurations
- Handled database management and design
- Developed and utilized REST APIs
- Maintained excellent collaboration with the internal team
- Demonstrated strong administrative skills
- Possessed outstanding customer service skills

Education

Bachelor of Software Engineering: Aug 2017 – June 2019
University of Canberra, ACT

Degree Related Projects

Vulnerable Windows Network Simulation (Group Project) - Developed a virtual network of Windows machines exhibiting a range of common misconfigurations and vulnerabilities. Sponsored by Shearwater Australia.

Project Scope:

- A virtual network comprising various versions of Windows virtual machines.
- Infrastructure setup included a server as the domain controller and two workstations.
- Machines pre-configured with vulnerable software.
- Automated generation capability for creating a network of machines via a graphical user interface (GUI).
- Technologies & Tools – Vagrant, packer, Windows PowerShell, VM VirtualBox, Windows 10, Windows 8, Windows Server 2012R2, Visual Studio, C#, Google Doc, Trello, OS Images, and scripts, .box files, GitHub Raspatory, IIS, MSSQL, .NET
- Accomplishments:
 - Fostered effective group collaboration
 - Demonstrated proficient project management skills
 - Developed comprehensive project documentation
 - Maintained clear and consistent communication with the project sponsor

Technical Skills

- **Programming Languages & Frameworks:** JavaScript, Angular 6, Typescript, Java, C++
- **Testing Tools:** Selenium WebDriver, TestNg, Lean FT, Postman, Apache JMeter
- **Databases:** MySQL
- **Web Technologies:** PHP, REST API, Google app scripting, JSON/XML, HTML5, CSS, jQuery, Bootstrap, Apache Server & configurations, AWS, NPM, Ubuntu server, NGINX, Bash, SSH, Docker, WordPress
- **Operating Systems:** Linux (Ubuntu), Windows
- **Application & Development Tools:** VS Code, WebStorm, Vagrant, Packer, MS Visual Studio, Linux Terminal, Oracle VM Virtual Box, Asana, IntelliJ, Zoho
- **Version Control & Build Tools:** Git, Maven
- **Development Methodologies:** SDLC (Agile/Scrum, Waterfall)

Soft Skills

- **Communication:** Honed through numerous group projects at university, where I collaborated with peers from diverse majors, nationalities, and levels of experience.
- **Teamwork:** In my current role, I've further strengthened my teamwork abilities, building upon experiences from past internships and university group projects. In the realm of software development, diverse skill sets converge to create a unified product. Ensuring each team member effectively contributes to their designated role is crucial for the project's success.
- **Personal Motivation:** I believe it's crucial to maintain personal motivation consistently. The tech landscape is ever evolving, necessitating continuous skill and knowledge updates. The best approach to this is self-learning and undertaking side projects.
- **Flexibility:** Acquired flexibility during my internship. In web development, various aspects need consideration, such as frontend, backend, testing, and database management. I am adept at navigating and contributing to any of these sectors.
